Navisworks
AGi32
Electrical System Design
Design Coordination
Technical Documentation

CREDENTIALS

Engineer in Training (EIT), Texas

EDUCATION

B.S. in Architectural Engineering
Southern Methodist University, 2023

Nicholas Arnold

Electrical Engineer | MEP Design

PROFESSIONAL SUMMARY

Electrical engineer with hands-on experience in MEP design across mission critical and higher education projects. Brings a strong foundation in architectural engineering and practical experience delivering electrical documentation, coordination, and system design for data center and campus facilities. Recognized for detail-oriented technical work and collaborative coordination with multidisciplinary project teams in the Texas market, with a focus on mission critical / data centers and higher education.

PROFESSIONAL EXPERIENCE

Electrical Project Engineer Apr 2025 – Present

Jacobs · Round Rock, TX

- Led electrical design and coordination for the Georgetown Data Center Hall Fit-Out ($24M), managing system layouts and documentation through construction support.
- Coordinated electrical distribution and power systems for the Round Rock Data Center Hall Fit-Out ($444M), working closely with mechanical and structural disciplines to resolve field and design conflicts.
- Developed electrical design deliverables for the Georgetown Campus Recreation Center ($216M), supporting higher education client requirements and code-compliant system design.
- Applied ETAP, AutoCAD MEP, and Revit MEP to model, document, and validate electrical systems across multiple concurrent project phases.

Electrical Designer Apr 2023 – Apr 2025

Jacobs · Round Rock, TX

- Prepared electrical drawings, schedules, and load documentation for mission critical and institutional project teams under senior engineer direction.
- Supported coordination reviews using Navisworks to identify clashes and streamline installation across electrical, mechanical, and plumbing trades.
- Performed lighting and electrical calculations using AGi32 and supported system sizing analyses in Carrier HAP.
